

Protect your smile and your health with preventive dental care

Good oral hygiene and professional dental care can help prevent cavities and gum disease. They can also lower your risk of certain health conditions, such as cardiovascular disease.

Your dental plan covers certain preventive services like routine exams, cleanings, and x-rays.

Make an appointment to see your dentist every 6 months to ensure early diagnosis and treatment of any dental issues you may have—and to keep your smile bright and healthy!

Regular dental care can help reduce the need for more complex—and expensive—dental procedures in the future.
