

Washington Network Closure Matrix

In Washington, updated as of **April 1, 2019**, many counties are closed to accepting new providers for behavior health counselor, chiropractic care, general surgery, massage therapy, and physical therapy. This matrix is intended to help providers identify whether their county is open to contracting for the service they provide.

Providers may be added to an existing contracted tax identification number (TIN) for closed counties. They will not be offered a contract if they leave that TIN and request a new or solo contract.

Note: This matrix is reviewed quarterly. If a network status changes from open to closed, acceptance is based on the provider's completed application received date.

County and Service Matrix
