ICD-10	Z76.1	Encounter for health supervision and care of foundling
ICD-10	Z76.2	Encounter for health supervision and care of other health infant and child

TIPS FOR SUCCESS

Patient Care

- Use every office visit, including problem focused visits to provide a well-child visit as well as discussing immunization status.
- Provide timely health information forms, especially for children with special needs, and giving clear advice about return to care after illness can be very helpful.
- Use well-care visits as an opportunity for screening and counseling.
- Coach staff to schedule visits within timeframe guidelines after each visit before the patient leaves the office.
- Explain why the well-child visit is important for assessing growth and development, and for providing immunizations and anticipatory guidance on diet, activity, and safety.
- Consider parents' work schedule as a barrier to visits and offer extended evening or weekend hours.

Documentation and Coding

- Partner with your health plan payers to submit electronic data from your EMR.
- Document medical and surgical history in the medical record with dates in structured fields so your EMR can include these in reporting. This will allow the corresponding code to be included in electronic reporting, including claims, to health plans.
- Code for exclusions.
- Use standardized documentation formats to capture the elements of a well-child visit and to assist with coding/billing procedures.
