

Rx Savings Solutions

PRESCRIPTION MEMBER ALERTS

Reduce overall pharmacy spend and lower prescription drug costs for members.

What it is

Rx Savings Solutions (RxSS) is a savings tool that works with Premera Blue Cross Blue Shield of Alaska pharmacy benefits. RxSS identifies and notifies members of opportunities to spend less on their prescription drugs with little to no impact on the member's healthcare journey.

How it works

Based on real prescription pricing, the tool uses these inputs to determine how members can save money at the pharmacy:

- claims data
- the member's actual plan benefits
- accumulators

Members in the program will receive letter, text, and/or email notifications of savings opportunities on their prescriptions.

Members can save in a variety of ways, such as switching to another pharmacy with lower out-of-pocket prices, trying a new or different generic medication, and learning about therapeutic alternatives. The tool also includes an online search capability so members can proactively view prescription savings opportunities. **On average, plans save \$2 for every \$1 in member savings.**

When a member chooses to change prescriptions, the RxSS concierge service makes it easy for members. RxSS partners with healthcare providers to get their approval on any changes and takes care of all the details.
