COLORECTAL CANCER SCREENING AND DIABETIC HBA1C MONITORING

Premera Blue Cross Blue Shield of Alaska has partnered with Let’sGetChecked to provide home test kits to members who meet certain guidelines. Home testing can improve healthcare access for members who don’t have easy or convenient access to care.

Recommended guidelines for screening and testing

Colorectal cancer screening: Individuals aged 45 to 75 years old should be regularly screened for colorectal cancer for early detection of abnormalities. The American Cancer Society recommends either a colonoscopy once every 10 years or a FIT (Fecal Immunochemical Test) every year.*

Hemoglobin A1c (HbA1c) test: Individuals aged 18 to 75 with a diagnosis of Type 2 diabetes should receive an HbA1c test at least once per year.
