

Department of Transportation Substance Abuse Professional service

FOR SELF-FUNDED GROUPS

When an employee in a safety-sensitive position fails to comply with drug or alcohol testing regulations, it creates challenges for the employee and the entire workflow. It's crucial for an employer managing this disruption to maintain productivity, safety, and regulatory compliance. Our Department of Transportation (DOT) Substance Abuse Professional (SAP) service, administered by ComPsych, simplifies the process, minimizes downtime, and ensures your organization meets all United States DOT regulations while supporting employee recovery.

DOT SAP is an add on to our Employee Assistance Program (EAP) with ComPsych.

Save time and money	Ensure DOT Compliance	Support employee wellbeing	Reduce liability
Streamlined case management reduces employee downtime and administrative costs, keeping your operations on track.	Avoid costly fines and legal risks with expert oversight and thorough documentation.	Connect employees to treatment and aftercare, fostering a healthier, safer workforce.	Comprehensive follow-up testing and monitoring to protect your organization and the public.

HOW IT WORKS

Start anytime, anywhere Your designated representative can initiate the process with a ComPsych GuidanceConsultant (Clinical Intake Counselor) 24/7 via dedicated toll-free line.

Expert case management The GuidanceConsultant assigns a ComPsych DOT Coordinator who works with you and the employee to facilitate an evaluation with a local ComPsych contracted SAP. Throughout the process, the coordinator will provide you with detailed updates on treatment recommendations, compliance, and follow-up testing requirements. ComPsych oversees every step from initial referral to aftercare monitoring, guaranteeing all documentation and procedures align with DOT regulations.

Return-to-work and beyond The DOT Coordinator monitors aftercare compliance post-return to work, collaborating with the employer's representative and employee to ensure safe resumption of safety-sensitive duties.

Add DOT SAP service to your EAP today and protect your bottom line while ensuring a safer workplace.
