Code List
(Codes reviewed are subject to change)

How do I ensure accurate coverage information?
Consult the member benefit booklet, or contact a customer service representative to determine coverage for a specific medical service or supply. Specific codes can be found within the Code List on the following pages.

What is the Code list?
This is a listing of the codes found in the Company's medical policies. The Code list provides the following information:

- The code and type of code (CPT or HCPCS) with a description
- The type of review required (e.g., Advanced Benefit Determination (ABD), prior authorization, or retrospective review) or if the service potentially may be denied
- If the code must meet medical necessity criteria to be approved, or if it is considered investigative, cosmetic, specialized durable medical equipment, or is an unlisted (non-specific) code
- If specific medical records are required with the request

What are the types of review done before a service is provided?
There are two types of review conducted prior to a service being provided: prior authorization and Advanced Benefit Determination (ABD) Each type of review determines if the service is medically necessary before the member's admission, stay, other service, or course of treatment, including outpatient procedures and services. Services that are not medically necessary are not covered, whether the review is done as a prior authorization or ABD..

- **Prior authorization:** Prior authorization/certification is required by the member's contract. If a provider performs a service or procedure without prior authorization medical necessity review, depending on the member's benefit plan, the charges/claim will either be denied, or a penalty will be applied.
- **Advanced Benefit Determination (ABD):** This is a utilization management review. ABD reviews are not contractually required; however, if an ABD review for medical necessity is not obtained, we will conduct a retrospective medical necessity review. If a provider performs a service or procedure without an ABD review, the member or provider may have to pay the full-service cost.

What is post service or retrospective review?
This refers to any review conducted after services have been provided, including outpatient procedures and services.

Services requiring prior authorization are listed below. This list is subject to change. Please refer to the member's contract for specific coverage details.

To search: Use CTRL+F for PCs or Command+F for Macs, and type in the code.
If no results are found, the code doesn't require review related to a medical policy.
All non-specific codes are reviewed retrospectively.
Please note that any planned inpatient stay always requires Precertification.
Items with PA require review and approval before the service is performed.

Code List

Code	Description	Plan Review Requirement	Reviewed For	Records Request
0002U	Oncology (colorectal), quantitative assessment of three urine metabolites (ascorbic acid, succinic acid and carnitine) by liquid chromatography with tandem mass spectrometry (LC-MS/MS) using multiple reaction monitoring acquisition, algorithm reported as likelihood of adenomatous polyps	Medical necessity review will be performed upon claims submission with supporting documentation	Medical Necessity	History and physical, and clinical documentation to support testing
0003U	Oncology (ovarian) biochemical assays of five proteins (apolipoprotein A-1, CA 125 II, follicle stimulating hormone, human epididymis protein 4, transferrin), utilizing serum, algorithm reported as a likelihood score	Medical necessity review will be performed upon claims submission with supporting documentation	Medical Necessity	History and physical, and clinical documentation to support testing
0005U	Oncology (prostate) gene expression profile by real-time RT-PCR of 3 genes (ERG, PCA3, and SPDEF), urine, algorithm reported as risk score	Prior Authorization Required	Investigative	History and physical, and chart notes from ordering provider with reason for testing
0006M	Oncology (hepatic), mRNA expression levels of 161 genes, utilizing fresh hepatocellular carcinoma tumor tissue, with alpha-fetoprotein level, algorithm reported as a risk classifier	Prior Authorization Required	Medical Necessity	History and physical, and chart notes from ordering provider with reason for testing
0007U	Drug test(s), presumptive, with definitive confirmation of positive results, any number of drug classes, urine, includes specimen verification including DNA authentication in comparison to buccal DNA, per date of service	Medical necessity review will be performed upon claims submission with supporting documentation	Medical Necessity	History and physical, and clinical documentation to support testing
00103	Anesthesia for reconstructive procedures of eyelid (eg, blepharoplasty, ptosis surgery)	Advance Benefit Determination (ABD) recommended	Medical Necessity	History and physical, documentation of medical necessity, and photographs

0012M	Oncology (urothelial), mRNA, gene expression profiling by real-time quantitative PCR of five genes (MDK, HOXA13, CDC2 [CDK1], IGFBP5, and XCR2), utilizing urine, algorithm reported as a risk score for having urothelial carcinoma	Prior Authorization Required	Medical Necessity	History and physical, and chart notes from ordering provider with reason for testing
0013M	Oncology (urothelial), mRNA, gene expression profiling by real-time quantitative PCR of five genes (MDK, HOXA13, CDC2 [CDK1], IGFBP5, and CXCR2), utilizing urine, algorithm reported as a risk score for having recurrent urothelial carcinoma	Prior Authorization Required	Medical Necessity	History and physical, and chart notes from ordering provider with reason for testing
0016U	Oncology (hematolymphoid neoplasia), RNA, BCR/ABL1 major and minor breakpoint fusion transcripts, quantitative PCR amplification, blood or bone marrow, report of fusion not detected or detected with quantitation	Prior Authorization Required	Medical Necessity	History and physical, and chart notes from ordering provider with reason for testing
00170	Anesthesia for intraoral procedures, including biopsy; not otherwise specified	Medical necessity review will be performed upon claims submission with supporting documentation	Medical Necessity	History and physical, documentation of medical necessity, and operative report. NOTE:Dental covers for dental procedures; all others refer to medical review
0017U	Oncology (hematolymphoid neoplasia), JAK2 mutation, DNA, PCR amplification of exons 12-14 and sequence analysis, blood or bone marrow, report of JAK2 mutation not detected or detected	Prior Authorization Required	Medical Necessity	History and physical, and chart notes from ordering provider with reason for testing
0018M	Transplantation medicine (allograft rejection, renal), measurement of donor and third-party-induced CD154+T-cytotoxic memory cells, utilizing whole peripheral blood, algorithm reported as a rejection risk score	Medical necessity review will be performed upon claims submission with supporting documentation	Medical Necessity	Submit history and physical, documentation of medical necessity.

Code List

Code	Description	Plan Review Requirement	Reviewed For	Records Request
0018U	Oncology (Thyroid), microRNA profiling by RT-PCR of 10 microRNA sequences, utilizing fine needle aspirate, algorithm reported as a positive or negative result for moderate to high risk of malignancy	Prior Authorization Required	Medical Necessity	History and physical, and chart notes from ordering provider with reason for testing
0022U	Targeted genomic sequence analysis panel, non-small cell lung neoplasia, DNA and RNA analysis, 23 genes, interrogation for sequence variants and rearrangements, reported as presence or absence of variants and associated therapy(ies) to consider	Prior Authorization Required	Medical Necessity	History and physical, and chart notes from ordering provider with reason for testing
0023U	Oncology (acute myelogenous leukemia), DNA, genotyping of internal tandem duplication, p.D835, p.I836, using mononuclear cells, reported as detection or nondetection of FLT3 mutation and indication for or against the use of midostaurin	Prior Authorization Required	Medical Necessity	History and physical, and chart notes from ordering provider with reason for testing
0026U	Oncology (thyroid), DNA and mRNA of 112 genes, next-generation sequencing, fine needle aspirate of thyroid nodule, algorithmic analysis reported as a categorical result ("Positive, high probability of malignancy" or "Negative, low probability of malignancy")	Prior Authorization Required	Investigative	History and physical, and chart notes from ordering provider with reason for testing
0027U	JAK2 (Janus kinase 2) (eg, myeloproliferative disorder) gene analysis, targeted sequence analysis exons 12-15	Prior Authorization Required	Medical Necessity	History and physical, and chart notes from ordering provider with reason for testing
0029U	Drug metabolism (adverse drug reactions and drug response), targeted sequence analysis (ie, CYP1A2, CYP2C19, CYP2C9, CYP2D6, CYP3A4, CYP3A5, CYP4F2, SLCO1B1, VKORC1 and rs12777823)	Prior Authorization Required	Medical Necessity	History and physical, and chart notes from ordering provider with reason for testing

0030U	Drug metabolism (warfarin drug response), targeted sequence analysis (ie, CYP2C9, CYP4F2, VKORC1, rs12777823)	Prior Authorization Required	Investigative	History and physical, and chart notes from ordering provider with reason for testing
0031U	CYP1A2 (cytochrome P450 family 1, subfamily A, member 2)(eg, drug metabolism) gene analysis, common variants (ie, *1F, *1K, *6, *7)	Prior Authorization Required	Medical Necessity	History and physical, and chart notes from ordering provider with reason for testing
0032U	COMT (catechol-O-methyltransferase)(drug metabolism) gene analysis, c.472G>A (rs4680) variant	Prior Authorization Required	Investigative	History and physical, and chart notes from ordering provider with reason for testing
0033U	HTR2A (5-hydroxytryptamine receptor 2A), HTR2C (5-hydroxytryptamine receptor 2C) (eg, citalopram metabolism) gene analysis, common variants (ie, HTR2A rs7997012 [c.614-2211T>C], HTR2C rs3813929 [c.-759C>T] and rs1414334 [c.551-3008C>G])	Prior Authorization Required	Investigative	History and physical, and chart notes from ordering provider with reason for testing
0034U	TPMT (thiopurine S-methyltransferase), NUDT15 (nudix hydroxylase 15)(eg, thiopurine metabolism), gene analysis, common variants (ie, TPMT *2, *3A, *3B, *3C, *4, *5, *6, *8, *12; NUDT15 *3, *4, *5)	Prior Authorization Required	Medical Necessity	History and physical, and chart notes from ordering provider with reason for testing
0036U	Exome (ie, somatic mutations), paired formalin-fixed paraffin-embedded tumor tissue and normal specimen, sequence analyses	Prior Authorization Required	Medical Necessity	History and physical, and chart notes from ordering provider with reason for testing
0039U	Deoxyribonucleic acid (DNA) antibody, double stranded, high avidity	Prior Authorization Required	Medical Necessity	History and physical, and documentation of medical necessity, and chart notes from ordering provider with reason for testing
0040U	BCR/ABL1 (t(9;22)) (eg, chronic myelogenous leukemia) translocation analysis, major breakpoint, quantitative	Prior Authorization Required	Medical Necessity	History and physical, and chart notes from ordering provider with reason for testing

0045U	Oncology (breast ductal carcinoma in situ), mRNA, gene expression profiling by real-time RT-PCR of 12 genes (7 content and 5 housekeeping)	Medical necessity review will be performed upon claims submission with supporting documentation	Medical Necessity	History and physical, and documentation of medical necessity, and chart notes from ordering provider with reason for testing
0046U	FLT3 (fms-related tyrosine kinase 3) (eg, acute myeloid leukemia) internal tandem duplication (ITD) variants, quantitative	Medical necessity review will be performed upon claims submission with supporting documentation	Medical Necessity	History and physical, and documentation of medical necessity, and chart notes from ordering provider with reason for testing
0047U	Oncology (prostate), mRNA, gene expression profiling by real-time RT-PCR of 17 genes (12 content and 5 housekeeping), utilizing formalin-fixed paraffin-embedded tissue, algorithm reported as a risk score	Medical necessity review will be performed upon claims submission with supporting documentation	Investigative	History and physical, and documentation of medical necessity, and chart notes from ordering provider with reason for testing
0048U	Oncology (solid organ neoplasia), DNA, targeted sequencing of protein-coding exons of 468 cancer-associated genes, including interrogation for somatic mutations and microsatellite instability, matched with normal specimens	Medical necessity review will be performed upon claims submission with supporting documentation	Medical Necessity	History and physical, and documentation of medical necessity, and chart notes from ordering provider with reason for testing
0049U	NPM1 (nucleophosmin) (eg, acute myeloid leukemia) gene analysis, quantitative	Medical necessity review will be performed upon claims submission with supporting documentation	Medical Necessity	History and physical, and documentation of medical necessity, and chart notes from ordering provider with reason for testing
0050U	Targeted genomic sequence analysis panel, acute myelogenous leukemia, DNA analysis, 194 genes, interrogation for sequence variants or rearrangements	Medical necessity review will be performed upon claims submission with supporting documentation	Medical Necessity	History and physical, and documentation of medical necessity, and chart notes from ordering provider with reason for testing
0055U	Cardiology (heart transplant), cell-free DNA, PCR assay of 96 DNA target sequences (94 single nucleotide polymorphism targets and two control targets), plasma	Prior Authorization Required	Medical Necessity	History and physical, and documentation of medical necessity, and chart notes from ordering provider with reason for testing
