

# Prescription Hormone Drug List

*Effective January 1, 2026*

Starting January 1, 2026, a new law in Washington State impacting fully insured WA groups will require health plans to allow members to receive a full year's supply of prescription hormone medication at one time, if they choose. This change is intended to make it easier for people to access their medication. The rule only applies to prescription hormone drugs that are taken continuously, kept at room temperature, and do not require special handling or monitoring. The law does not change which drugs are covered or the price members pay, but it does make it easier to get more medication at a time, if desired.

## Key:

- Brand-name drugs are listed in CAPITAL letters (e.g., ACTIVELLA).
- Generic drugs are listed in lower case letters (e.g., hydrocortisone tablet).
- An asterisk (\*) next to a drug name signifies the drug is a specialty medication.

|                    |                          |                          |                        |
