Introduction

The Plan uses InterQual® to review certain services for medical necessity as listed in this guideline. InterQual is evidence-based criteria that offers guidance in covering medical and behavioral health for all levels of care in addition to care planning, complex care management, durable medical equipment, procedures, and specialty pharmacy.

Note: The Introduction section is for your general knowledge and is not to be taken as policy coverage criteria. The rest of the policy uses specific words and concepts familiar to medical professionals. It is intended for providers. A provider can be a person, such as a doctor, nurse, psychologist, or dentist. A provider also can be a place where medical care is given, like a hospital, clinic, or lab. This policy informs them about when a service may be covered.
