Introduction

The Plan uses criteria from the American Society of Addiction Medicine (ASAM) to review for residential, inpatient, and detoxification services for adults and adolescents. ASAM criteria were created to improve access to and quality of care in the treatment of substance use disorders. These criteria match individual patients with the appropriate services to help patients succeed in their recovery. This policy describes which types of substance use disorder treatment may be considered medically necessary when using ASAM criteria.

Note: The Introduction section is for your general knowledge and is not to be taken as policy coverage criteria. The rest of the policy uses specific words and concepts familiar to medical professionals. It is intended for providers. A provider can be a person, such as a doctor, nurse, psychologist, or dentist. A provider also can be a place where medical care is given, like a hospital, clinic, or lab. This policy informs them about when a service may be covered.
