Introduction

Ultraviolet B (UVB) light therapy, also called phototherapy, is a treatment for severe and chronic skin conditions. The goal of UVB therapy is to reduce itching, help the skin make more vitamin D, and increase bacteria-fighting systems in the skin. With UVB therapy, affected areas of the skin are exposed to artificial UV light through a light box. This policy describes when using ultraviolet B light therapy in the home to treat skin conditions may be considered medically necessary.

Note: The Introduction section is for your general knowledge and is not to be taken as policy coverage criteria. The rest of the policy uses specific words and concepts familiar to medical professionals. It is intended for providers. A provider can be a person, such as a doctor, nurse, psychologist, or dentist. A provider also can be a place where medical care is given, like a hospital, clinic, or lab. This policy informs them about when a service may be covered.

Policy Coverage Criteria
<table>
<thead>
<tr>
<th>Service</th>
<th>Medical Necessity</th>
</tr>
</thead>
</table>
| Ultraviolet B light therapy in the home to treat skin conditions may be considered medically necessary for the following indications: | - Coverage of home light box therapy requires all of the following:  
  - The device must be prescribed by a dermatologist  
  - The prescribed device must be approved by the U. S. Food and Drug Administration (FDA)  
  - The prescribed device must be appropriate for the extent of body surface involvement  
  - The light source of the device must provide UVB light only  
  - The patient must be capable of operating the light box and following specific treatment instructions determined by the prescribing dermatologist  
  - The dermatologist must maintain accurate treatment records available upon request  
  - The patient must be unable to travel for office-based therapy OR it has been determined that home therapy will be more cost-effective than office-based treatment for the patient  
  - The patient must have one of the diseases specified as effective for home therapy, such as:  
    - Psoriasis  
    - Atopic dermatitis/severe eczema  
    - Pruritis secondary to an underlying disease  
    - Cutaneous T-cell lymphoma (CTCL)  
    - Mycosis fungoides (MF)  
    - Lichen planus  
    - Polymorphic light eruption  
    - Sezary’s Disease  
  - The patient’s skin disorder must be:  
    - Severe  
    - Extensive (large body area or extensive involvement of the hands and feet)  
    - Refractory for a long-period of time (> 4 months)  
  - The patient must require treatments at least three times per week |
## Service | Medical Necessity
--- | ---
 | o The patient’s condition must be chronic in nature and require long-term maintenance therapy

### Related Information

### Limitations

1. UV box therapy in the home is NOT covered when:
   - Used for treatment of Seasonal Affective Disorders (SAD)
   - The patient does not meet all of the qualifying clinical indications
   - It is being requested solely for the patient’s convenience
   - It is for cosmetic purposes such as tanning

2. Psoralen and Ultraviolet A Light Therapy (PUVA) are not covered for home use.

### Evidence Review

### Background

Psoriasis is a chronic skin disease, affected approximately 2% of the population. Methods of treatment may include topical application of steroids or other drugs; ultraviolet light (actinotherapy); and coal tar alone or in combination with ultraviolet B light (Goeckerman treatment).

Broadband ultraviolet B (UVB), narrow band UVB, psorlaen plus ultraviolet A (PUVA) are types of phototherapy. Phototherapy aims to reduce itch, promote an anti-inflammatory effect, increase vitamin D production and help increase bacteria-fighting systems in the skin.

In UVB types of therapy, affected areas of the skin are exposed to artificial UV radiation. Broad band UVB light emits wavelengths in the range of 290 to 320 nanometers (nm), and narrow
band UVB light emits wavelengths in the range of 311-312 nm. NB-UVB is more commonly prescribed than BB-UVB for psoriasis treatment, especially for home therapy, as it has been shown to have greater efficacy, clears plaques more quickly, and is preferred by patients.

**Disclaimer:** This medical policy is a guide in evaluating the medical necessity of a particular service or treatment. The Company adopts policies after careful review of published peer-reviewed scientific literature, national guidelines and local standards of practice. Since medical technology is constantly changing, the Company reserves the right to review and update policies as appropriate. Member contracts differ in their benefits. Always consult the member benefit booklet or contact a member service representative to determine coverage for a specific medical service or supply. CPT codes, descriptions and materials are copyrighted by the American Medical Association (AMA). ©2020 Premera All Rights Reserved.

**Scope:** Medical policies are systematically developed guidelines that serve as a resource for Company staff when determining coverage for specific medical procedures, drugs or devices. Coverage for medical services is subject to the limits and conditions of the member benefit plan. Members and their providers should consult the member benefit booklet or contact a customer service representative to determine whether there are any benefit limitations applicable to this service or supply. This medical policy only applies to Individual Plans.
Discrimination is Against the Law

Premera Blue Cross complies with applicable Federal civil rights laws and does not discriminate on the basis of race, color, national origin, age, disability, or sex. Premera does not exclude people or treat them differently because of race, color, national origin, age, disability or sex.

Premera:
- Provides free aids and services to people with disabilities to communicate effectively with us, such as:
  - Qualified sign language interpreters
  - Written information in other formats (large print, audio, accessible electronic formats, other formats)
- Provides free language services to people whose primary language is not English, such as:
  - Qualified interpreters
  - Information written in other languages

If you need these services, contact the Civil Rights Coordinator.

If you believe that Premera has failed to provide these services or discriminated in another way on the basis of race, color, national origin, age, disability, or sex, you can file a grievance:
