Introduction

A hearing aid is a small device that fits in or on the ear. It is worn to help people who have lost hearing sense by making sounds louder so they can be heard. Hearing aids are only covered when the member has a specific benefit. This policy explains when hearing aids would be covered if the member has a hearing aid benefit.

Note: The Introduction section is for your general knowledge and is not to be taken as policy coverage criteria. The rest of the policy uses specific words and concepts familiar to medical professionals. It is intended for providers. A provider can be a person, such as a doctor, nurse, psychologist, or dentist. A provider also can be a place where medical care is given, like a hospital, clinic, or lab. This policy informs them about when a service may be covered.

Coverage Guidelines

If benefits for a hearing aid are available, the following criteria apply. (See [below](#) for state mandate for Oregon members).

Equipment	Medical Necessity
Hearing aids	Hearing aids that are FDA-approved and dispensed by prescription may be considered medically necessary for a moderate hearing loss of 40 to 60 dB (based on pure tone

Equipment	Medical Necessity
	<p>average bone-conduction detection threshold) for any of the following:</p> <ul style="list-style-type: none"> • Conductive hearing loss (external and middle ear blockage/damage/disease) that is unresponsive to medical/surgical interventions <p>OR</p> <ul style="list-style-type: none"> • Sensorineural hearing loss (inner ear cilia are damaged) <p>OR</p> <ul style="list-style-type: none"> • Mixed hearing loss (combination of conduction hearing loss and sensorineural hearing loss) <p>Traditional hearing aids are externally worn microphones that amplify sound to the ear through an ear mold that fits in the ear canal (see Definition of Terms).</p> <p>Selection of the hearing aid is based on the results from a complete work-up performed by a hearing professional that includes skilled hearing tests and assessment along with fitting the chosen device.</p> <p>The hearing aid dispensed should meet the hearing requirements of the member in the environments and under the conditions where enhanced hearing is needed.</p> <p>Note: This policy does not address semi-implantable/fully-implantable or bone anchored hearing devices (see Related Policies/Guidelines).</p>

Equipment	Investigational
Hearing Aids	<p>Hearing aids that are investigational include but are not limited to:</p> <ul style="list-style-type: none"> • Non-implantable intraoral (in the mouth) bone conduction hearing aids (eg, SoundBite™ Hearing System)

Equipment	Non-Covered
Hearing Aids	Over-the-counter hearing assistive devices/personal sound amplification products (PSAPs) available without a prescription are not covered (eg, NewEar™, Pocketalker®, TV Ears® and others).

Requirement	Coverage Guidelines
Documentation	<p>Documentation must include ALL of the following information:</p> <ul style="list-style-type: none"> • Written prescription from the examining physician/licensed healthcare provider within the past 6 months <p>AND</p> <ul style="list-style-type: none"> • A complete audiology evaluation within the past 6 months <p>AND</p> <ul style="list-style-type: none"> • Explanation of audiometric test data/results that demonstrates the member’s hearing loss & need for a hearing aid <p>AND</p> <ul style="list-style-type: none"> • History of prior use or current use of a hearing aid (not applicable if the member has never had a hearing aid) <p>AND</p> <ul style="list-style-type: none"> • Recommendation for the type of hearing aid technology that is appropriate for the member <p>AND</p> <ul style="list-style-type: none"> • Follow up plan for assessing the effectiveness/outcome of using a hearing aid - a trial period may be needed to test the usability of a specific hearing aid model/type

Coding

Code	Description
CPT	
92550	Tympanometry and reflex threshold measurements
92551	Screening test, pure tone, air only
92552	Pure tone audiometry (threshold); air only

Code	Description
92553	Pure tone audiometry (threshold); air and bone
92555	Speech audiometry threshold;
92556	Speech audiometry threshold; with speech recognition
0208T	Pure tone audiometry (threshold), automated; air only
0209T	Pure tone audiometry (threshold), automated; air and bone
0210T	Speech audiometry threshold, automated;
0211T	Speech audiometry threshold, automated; with speech recognition
0212T	Comprehensive audiometry threshold evaluation and speech recognition (0209T, 0211T combined), automated
HCPCS	
V5014	Repair/modification of a hearing aid
V5030	Hearing aid, monaural, body worn, air conduction
V5040	Hearing aid, monaural, body worn, bone conduction
V5050	Hearing aid, monaural, in the ear
V5060	Hearing aid, monaural, behind the ear
V5120-V5267	Hearing aids, services and accessories
V5298	Hearing aid, not otherwise classified

Related Information

Definition of Terms

Audiometric testing: Diagnostic tests that evaluate the ability to hear sounds. The intensity (loudness) of sound is measured in decibels. The tone (speed of sound wave vibrations) is measured in cycles per second. The standard battery of hearing tests varies depending on whether the patient is an infant, child or adult.

Hearing impairment (deafness/hearing loss): A reduction in the ability to perceive sound that is classified as mild, moderate, severe or profound.

Pure tone average (PTA): Average air conduction threshold measured with an earphone.

Traditional hearing aid: A non-implanted, non-disposable on-ear or in-ear device that is FDA-approved and dispensed only by prescription.

Exclusions and Limitations

Hearing aids are specifically excluded under many benefit plans (see [Scope](#)).

When hearing aid benefits exist in a health plan, limitations may include a dollar maximum and/or frequency of benefit availability (eg, once every 36 months or once every 48 months).

Oregon

Oregon has a specific statute that mandates a benefit level of coverage set by the state and adjusted annually for one nondisposable hearing aid per hearing impaired ear for covered members who are 18 years of age or younger OR 19 to 25 years of age and enrolled in a secondary school or an accredited educational institution. More information regarding covered and non-covered services and other administrative criteria for dispensing hearing aids and the frequency of replacements can be found at the following link:

https://www.oregonlegislature.gov/bills_laws/ors/ors743A.html (See section 743A.141 Hearing Aids), accessed February 2020¹ (see [Scope](#)).

Evidence Review

Background

Degree of Hearing Loss

Hearing loss is described as conductive, sensorineural, or mixed, and can be unilateral (one ear) or bilateral (both ears). The American Speech - Language - Hearing Association (ASHA) has defined the degree of hearing loss based on pure-tone average (PTA). The PTA is the average

air-conduction threshold for 1000 and 2000 Hz, and 3000 Hz measured with an earphone. Normal hearing is the detection of sound at or below 20 decibels (dB).²

The degree of hearing loss based on PTA detection thresholds is defined as:

- Mild hearing loss (20 to 40 dB)
- Moderate hearing loss (40 to 60 dB)
- Severe hearing loss (60 to 80 dB)
- Profound hearing loss (greater or equal to 80 dB)

Hearing Instrument/Aids

A hearing aid is an electronic device used to help members with a hearing impairment by providing sound amplification through the use of a microphone, amplifier and receiver. Members with moderate to severe sensorineural hearing loss are usually fit with acoustic hearing aids that are worn externally. An air-conduction (AC) hearing aid can benefit members with sensorineural, conductive, or mixed hearing loss. Contralateral routing of signal (CROS) is a system in which a microphone on the affected side transmits a signal to an air-conduction hearing aid on the normal or less affected side.³⁻⁵ Hearing aids that are marketed for use by the public should have approval from the U.S. Food and Drug Administration (FDA).

Hearing Aid Styles

There are two hearing aid styles:³⁻⁵

- The body level instrument/aid (worn on the body) is not commonly prescribed and yet may be used for patients, including infants, whose ears are too small to hold a behind the ear aid.
- The ear level instrument/aid (worn on and/or in the ear) is categorized by where on the ear the device is worn:
 - Behind the ear (BTE)
 - Completely in the canal (CIC)
 - In the canal (ITC)

- In the ear (ITE)

The receiver that fits in the ear canal for all hearing aids requires a mold and is custom-fitted to the patient.

Hearing Aid Types

There are three types of hearing aids:³⁻⁵

- Analog hearing aids convert sound waves that are amplified as an electrical signal in proportion to the sound signal. They have a few adjustment options for the audiologist to fine-tune the instrument to meet the member's amplification needs. Analog aids are a relatively inexpensive option. However, analog hearing aids are being replaced by digital technology.
- Digital hearing aids convert sound waves into numerical codes before amplifying them, similar to binary computer code. This technology is more flexible with options for fine tuning the hearing aid to the member's hearing needs by the audiologist and user.
- Digital hybrid hearing aids have both analog technology for sound processing and digital technology for programming. Hybrid aids offer more options for the audiologist and user to adjust the "channels" to meet a variety of listening environments.

There are many brands of hearing aids available. This link includes a chart of some of the brands: <https://www.hearingtracker.com/blog/hearing-aid-brands-explained/>, last modified November 20, 2019, accessed February 2020.

Accessories

Telephone adapters are not covered.

Batteries and cords often are not covered.

Benefits for the following are often included in the hearing aid benefit limits or may not be covered:

- Ear molds
- Hearing aid dispensing fees

- Hearing aid fittings

Over-the-Counter Hearing/Listening Assistive Devices

Over-the-counter hearing assistive devices/personal sound amplification products (PSAPs) available without a prescription are not covered. These include but are not limited to the following:

- Cyberscience Amplifier
- NewEar™
- Pocketalker®
- TV Ears®

Repair/Replacement

Benefits for hearing aid repair/replacement services are often included in the hearing aid benefit limits or may not be covered (see [Scope](#)).

Medicare National Coverage

Hearing aids or examination for the purpose of prescribing, fitting, or changing hearing aids are excluded from coverage.⁷

Regulatory Status

Air conduction hearing aids that are intended to compensate for hearing loss are regulated by the U.S. Food and Drug Administration (FDA). The FDA does not consider sound amplifiers to be medical devices when labeled for recreational or other use by individuals with normal hearing. However, certain safety regulations related to sound output levels still apply to these products.⁶

Scope: Medical policies are systematically developed guidelines that serve as a resource for Company staff when determining coverage for specific medical procedures, drugs or devices. Coverage for medical services is subject to the limits and conditions of the member benefit plan. Members and their providers should consult the member benefit booklet or contact a customer service representative to determine whether there are any benefit limitations applicable to this service or supply. This medical policy does not apply to Medicare Advantage.

Discrimination is Against the Law

Premera Blue Cross complies with applicable Federal civil rights laws and does not discriminate on the basis of race, color, national origin, age, disability, or sex. Premera does not exclude people or treat them differently because of race, color, national origin, age, disability or sex.

Premera:

- Provides free aids and services to people with disabilities to communicate effectively with us, such as:
 - Qualified sign language interpreters
 - Written information in other formats (large print, audio, accessible electronic formats, other formats)
- Provides free language services to people whose primary language is not English, such as:
 - Qualified interpreters
 - Information written in other languages

If you need these services, contact the Civil Rights Coordinator.

If you believe that Premera has failed to provide these services or discriminated in another way on the basis of race, color, national origin, age, disability, or sex, you can file a grievance with:

Civil Rights Coordinator - Complaints and Appeals
PO Box 91102, Seattle, WA 98111
Toll free 855-332-4535, Fax 425-918-5592, TTY 800-842-5357
Email AppealsDepartmentInquiries@Premera.com

You can file a grievance in person or by mail, fax, or email. If you need help filing a grievance, the Civil Rights Coordinator is available to help you.

You can also file a civil rights complaint with the U.S. Department of Health and Human Services, Office for Civil Rights, electronically through the Office for Civil Rights Complaint Portal, available at <https://ocrportal.hhs.gov/ocr/portal/lobby.jsf>, or by mail or phone at: U.S. Department of Health and Human Services
200 Independence Avenue SW, Room 509F, HHH Building
Washington, D.C. 20201, 1-800-368-1019, 800-537-7697 (TDD)
Complaint forms are available at <http://www.hhs.gov/ocr/office/file/index.html>.
