Introduction

Equipment that is used to help a patient heal from a certain medical condition and/or illness is called durable medical equipment. The equipment is mainly used for a medical purpose and would not be useful to someone without an illness, disability, or injury. These items are ordered or prescribed by the patient’s doctor or health care provider and are reusable; they can be used in the patient’s home. While there are many others, some examples are wheelchairs, canes, crutches, walkers, ventilators, monitors, and lifts. This policy explains when durable medical equipment is covered.

Note: The Introduction section is for your general knowledge and is not to be taken as policy coverage criteria. The rest of the policy uses specific words and concepts familiar to medical professionals. It is intended for providers. A provider can be a person, such as a doctor, nurse, psychologist, or dentist. A provider also can be a place where medical care is given, like a hospital, clinic, or lab. This policy informs them about when a service may be covered.
Please see the definition of “durable medical equipment” in the member’s plan document for the purpose of making benefit determinations.

<tr>
<th>Equipment</th>
<th>Medical Necessity</th>
</tr>
</thead>
<tbody>
<tr>
<td>Durable medical equipment</td>
<td>Durable medical equipment (DME) also known as home medical equipment (HME) may be considered medically necessary when ALL of the following criteria are met:</td>
</tr>
<tr>
<td></td>
<td>• The patient has a documented physical functional impairment or disability due to disease, trauma, congenital anomaly or prior therapeutic intervention and requires accommodation for basic activities of daily living (ADLs) that can be met by using a DME item AND</td>
</tr>
<tr>
<td></td>
<td>• Documentation in the medical record contains a clinical assessment and rationale for the requested DME item (see Documentation Requirements) AND</td>
</tr>
<tr>
<td></td>
<td>• The DME is prescribed by a health care practitioner AND</td>
</tr>
<tr>
<td></td>
<td>• The piece of equipment meets the definition of DME (see Definition of Terms) AND</td>
</tr>
<tr>
<td></td>
<td>• The requested DME item is not considered investigational or unsafe by a regulatory agency, and is not excluded by plan benefits or considered a contract exclusion</td>
</tr>
</tbody>
</table>

Durable medical equipment (DME) is considered not medically necessary when criteria are not met.

The following are considered not medically necessary:

• Accessory add-ons and upgrades when a basic DME item meets the member’s functional needs
• Athletic/exercise/physical fitness equipment (eg, treadmills, stationary bikes)
• Comfort or convenience items added to basic equipment
• Deluxe equipment when basic (standard) equipment is available and meets the member’s functional needs
• Duplicate equipment that meets the same functional need (eg,
<table>
<thead>
<tr>
<th>Equipment</th>
<th>Medical Necessity</th>
</tr>
</thead>
<tbody>
<tr>
<td>a rolling walker, when the member has a properly fitted cane)</td>
<td>- Elastic garments (eg, stabilizing pressure input orthoses – SPIO)</td>
</tr>
<tr>
<td></td>
<td>- Equipment and modifications/upgrades to equipment when used primarily for leisure or recreational activities (eg, special wheelchair wheels for sport activities, adaptations for beach use, skiing and others)</td>
</tr>
<tr>
<td></td>
<td>- Equipment used for environmental control or to enhance the environmental surroundings (eg, air conditioners, air filters, humidifiers, allergy protective pillow/mattress covers, furniture [eg, recliner chairs, over-bed tables], and others)</td>
</tr>
<tr>
<td></td>
<td>- First aid or precautionary equipment (eg, automatic external defibrillator [AED])</td>
</tr>
<tr>
<td></td>
<td>- Home modifications (eg, bath grab bars, electronic door openers, elevators, Jacuzzi/whirlpools, ramps)</td>
</tr>
<tr>
<td></td>
<td>- Institutional equipment (eg, any DME that is used only in a medical facility and is not suitable for use in the home setting)</td>
</tr>
<tr>
<td></td>
<td>- Maintenance and service fees for DME</td>
</tr>
<tr>
<td></td>
<td>- Redundant or back-up DME item(s) not used as the primary device to meet the member’s functional needs (ie, more than one of the same item of durable medical equipment)</td>
</tr>
</tbody>
</table>

**Note:** While there are items that are typically considered convenience devices, in certain situations, these same items may serve a medically therapeutic purpose. Requests for such items will be reviewed for medical necessity.

**The following are covered without review:**
- Speech generating devices (SGEs)
- A software program to be used with a personal device for essential communication
- Artificial laryngeal devices (prosthetic)

**Durable medical equipment may include the following:**
- Purchased equipment when the purchased DME is less expensive than the rental of the equipment or if the DME is not available for rental
- Rental charges for the DME if rental is less expensive than the purchase price of the equipment
### Equipment | Medical Necessity
--- | ---
| • Repair, adjustment, or replacement of parts and accessories necessary for the normal and effective functioning of the DME (see Related Policies).

### Equipment | Non-Covered
--- | ---
| Durable medical equipment | Durable medical equipment is not covered when:
| • It is considered experimental or investigational or used for experimental or investigational therapy or interventions
| • It is associated with athletic, scholastic, educational/vocational training of the patient
| • It does not meet a medical need and is dispensed by a DME supplier without a prescription

**The following are considered non-covered items:**

- Altered auditory feedback (AAF) devices to treat individuals who stutter are considered investigational
- Multiple-function hardware devices that do not meet the definition of durable medical equipment (DME), because they are not primarily intended for medical purposes, include but are not limited to:
  - Desktop and laptop computers
  - Personal digital assistants (PDA)
  - Smartphones
  - Tablet computers
  - Internet or phone services or any modification to a patient’s home to allow use of DME

**Note:** If there is a specific DME item addressed in another policy please refer to that policy.

### Documentation Requirements

Medical necessity for a DME item is determined by the patient’s current condition and not by probable deterioration in the future. There are varying degrees of medical conditions and these medical conditions may contribute to the member’s underlying problem and need for home medical equipment.
Documentation Requirements

- Patients should have a face-to-face clinical evaluation with a physician, or other qualified professional to assess their home equipment needs.
- Documentation from the clinical evaluation should include the following:
  - An order/prescription from the physician/health care provider responsible for the patient’s care that states the therapeutic purpose of the DME
  - Details of the patient’s physical functional impairment related to completing activities of daily living (ADLs) without the home medical equipment/DME
  - The patient’s medical condition that requires DME for long term use (ie, 6-12 months or more) when applicable
  - What assistive devices (eg, canes, walkers, manual wheelchairs) the patient has trialed and found inadequate/unsafe or contraindicated to completely meet their functional needs (when applicable)

Note: Even when a provider orders or prescribes DME and deems the equipment necessary for the patient’s functional needs, that does not mean that the item meets the criteria as listed in the guideline. It also does not guarantee that the item will be considered medically necessary by the Plan.

Related Information

Definition of Terms

Activities of daily living (ADLs): Self-care activities done daily where a person lives that include:

- Ambulating (walking)
- Bathing/dressing
- Eating
- Hygiene/grooming
- Toileting
Transferring

**Convenience items:** Equipment that serves no medical purpose or that is primarily for comfort/convenience. These items are excluded from coverage under most health plan benefits.

**Durable medical equipment (DME):** Consists of items that are:

- Appropriate for and primarily used in the home setting
- Designed to be long-lasting and can stand repeated use (durable)
- Not implantable in the body
- Not solely for the convenience of the patient or caregiver
- Not useful to a person without an illness or injury
- Ordered or prescribed by a physician or other qualified provider
- Primarily and normally used to serve a medical purpose
- Reusable (non-disposable)

**Homebound:** A homebound person has a condition that impairs their ability to leave home independently and as a result, leaving home requires a taxing effort. The patient may leave home, but the time away should be short, infrequent, and mainly for receiving medical treatment. Homebound status may be applied to people with poor resistance to disease or have such poor health that reverse isolation precautions are recommended by their providers to avoid exposure to infection.

Examples of a poor resistance to disease may include but are not limited to:

- Patients undergoing chemotherapy, or
- Patients with a chronic disease that has lowered their immune status or
- Premature infants

Homebound status also applies to those members that require assistance when performing activities of daily living.

**Note:** Homebound status is not determined by the lack of available transportation or inability to drive.

**Instrumental activities of daily living (IADLs):** Activities related to independent living but not always done on a daily basis and include:
• Communication (using the phone, computer or other communication devices)
• Housework/home maintenance
• Managing personal medications
• Managing personal finances
• Preparing meals
• Shopping (for basic necessities)
• Transportation (driving or using public transit)

**Mobility limitation:** A limitation that:

• Prevents a person from accomplishing mobility related activities of daily living entirely
• Places a person at reasonably determined heightened risk of morbidity or mortality secondary to the attempts to perform a mobility related activity of daily living
• Prevents a person from completing a mobility related activity of daily living within a reasonable time frame

**Physical functional impairment:** A limitation from normal (or baseline) level of physical functioning. The physical functional impairment can be due to structure, congenital deformity, pain, or other causes. Physical functional impairment excludes social, emotional and psychological impairments or potential impairments.

Limitations from a normal level of function may include, but are not limited to problems with the following:

• Ambulation (walking)
• Communication
• Eating
• Facial expression
• Malformation/distortion of body parts
• Mobilization
• Obstruction of an orifice
Durable medical equipment (DME) includes items of medical equipment, owned or rented, that are used by patients to facilitate treatment or rehabilitation. DME consists of items that can withstand repeated use by different patients. DME should provide a level of performance and quality of construction for the patient's functional need and medical condition.

**Convenience Item**

There are devices that can make life easier for a sick or disabled person, but do nothing to treat the underlying illness, injury or disability. These devices, inventions and many other items available are often confused with DME but do not qualify as DME because they do not meet the definition of DME and/or they are considered to be comfort or convenience items. A convenience item is any object or a device that increases physical comfort without serving a medically necessary purpose, such as a reclining chair, portable whirlpool pump, bedside table or electrical or mechanical features which enhance basic equipment.

**Stabilizing Pressure Input Orthoses (SPIO)**

Stabilizing Pressure Input Orthoses (SPIO) fall into a category of therapy called ‘suit therapy’. The garment is made from a Lycra-like blend of material and has a semi rigid but flexible Velcro sensitive neoprene panels against the trunk of the body with adjustment straps. It is a flexible bracing system and intended to provide deep pressure through compression. There is currently insufficient evidence to support the effectiveness of SPIO.
Stuttering Treatment or Prevention

A device that manipulates or alters auditory feedback (AAF) is also known as delayed auditory feedback (DAF) and frequency-shifted auditory feedback (FAF). These devices are used to help with speech dysfluency or stuttering. There is insufficient evidence currently to conclude that stuttering devices are effective in the treatment of stuttering or dysfluency.

Medicare National Coverage

Durable medical equipment regional carriers (DMERC) are responsible for creating coverage policies for Medicare regarding durable medical equipment. When the contractor receives a claim for an item of equipment which does not appear to fit any of the generic categories listed in the NCD guide, the contractor has the authority and responsibility for deciding whether those items are covered under the DME benefit.

These decisions must be made by each contractor based on the advice of its medical consultants, taking into account:

- The Medicare Claims Processing Manual, Chapter 20, “Durable Medical Equipment, Prosthetics and Orthotics, and Supplies (DMEPOS).”
- Whether the item has been approved for marketing by the Food and Drug Administration (FDA) and is otherwise generally considered to be safe and effective for the purpose intended; and
- Whether the item is reasonable and necessary for the individual patient.
