Introduction

Dental restorations are a general term to describe fillings, crowns, inlays/onlays, and veneers. Tooth decay, cracks, or a break in the structure of the tooth are some of the more common reasons for dental restorations. This policy describes when dental restorations are covered. Cosmetic dental restorations improve only the look, color, or shape of the teeth and do not relieve pain or improve, correct, or restore function. Cosmetic dental restorations are not covered.

Note: The Introduction section is for your general knowledge and is not to be taken as policy coverage criteria. The rest of the policy uses specific words and concepts familiar to medical professionals. It is intended for providers. A provider can be a person, such as a doctor, nurse, psychologist, or dentist. A provider also can be a place where medical care is given, like a hospital, clinic, or lab. This policy informs them about when a service may be covered.
